

Tab Generator

Source: <https://github.com/obzerving/Tabgen>

About

Inkscape extension for putting tabs and scorelines on **closed** paths and objects like rectangles or other polygons. Given a closed path of straight lines, this program generates a paper model of tabs and score lines for each **straight** edge. You may not use bezier curves. Please convert them to polylines, for example using [Convert To Polylines](#) or [Approximate Curves by Straight Lines \(Flatten Beziers\)](#)

Tab Generator

Settings Help

Measures and tab generation

Angle of tab edges (degrees): 35,0 - +

Height of tab: 5,0 - +

Length of dash line (zero for solid line): 0,0 - +

Tab placement on polygons with cutouts: both ▾

Dimensional units of above parameters and the selected paths: mm ▾

Styles

Cosmetic dash lines

Solid line color 

Dash line color
