

Edit Attributes

Edits an attribute on all selected elements. Available edit options:

- set sets new value of attribute (adds attribute if necessary)
- append adds new value to the end of current value of attribute
- prefix adds new value to the beginning of current value of attribute
- subtract deletes the given value string from current value of attribute
- remove deletes attribute of given name

The screenshot shows a dialog box titled "Edit Attributes" with a close button (X) in the top right corner. Inside the dialog, there is a text area with the instruction "Edit value of attribute on selected elements. For namespaces use {namespaceUrl}attributeName". Below this, there are two input fields: "Name:" with the value "ry" and "Value:" with the value "23". Under the "Name:" field, there is a label "Operation on attribute" and a dropdown menu currently showing "Remove attribute". At the bottom left, there is a checkbox labeled "Live preview" which is currently unchecked. At the bottom right, there are two buttons: "Close" and "Apply".
