

Exponential Distort

 Exponential X-Axis ✕

This exponential-x-axis extension distorts objects along the x-axis. The bounding box remains unchanged. Inner points move leftwards when the exponent is > 1 and rightwards when it is < 1 . This can be used to create a logarithmic scale.

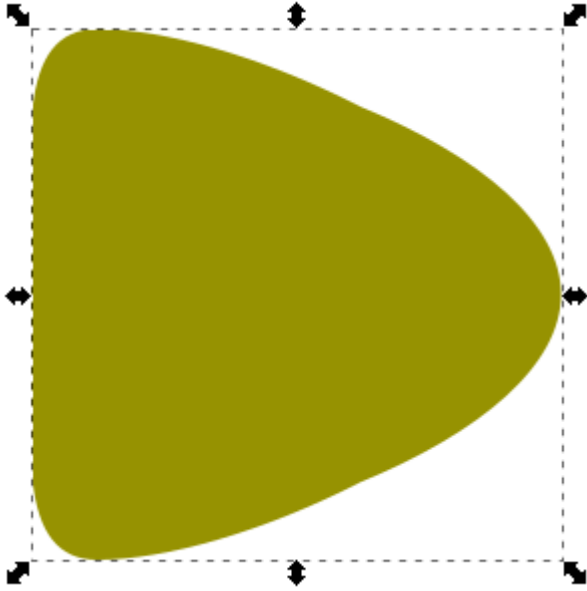

Exponent:

Padding [%]:

Apply padding to soften the effect. Without padding the exponential curve runs from 0 to 1.
With e.g. 100% padding it runs from 0.5 to 1.
