Options

☐ Include default grays

☒ Replace existing palette

Sort colors

Selection / Z-index

ⓘ Don't forget to restart Inkscape

Close Apply

Usage

- Create objects with color properties set, can be fill and/or stroke color.
- Select them and from the Extensions menu choose Palette and Generate.
- Provide a name and select the color property to grab colors from.

You can also include Inkscape's default black to white colors or replace an existing palette.

Notes

- Inkscape must be restarted for a new palette to appear.
- Generated palettes are located at `~/.config/inkscape/palettes` or `~\AppData\Roaming\inkscape\palettes` on Windows. You can delete them accessing that folder
