

Sheriff Star

Source of documentation:

<https://github.com/garykac/pathmonkey>

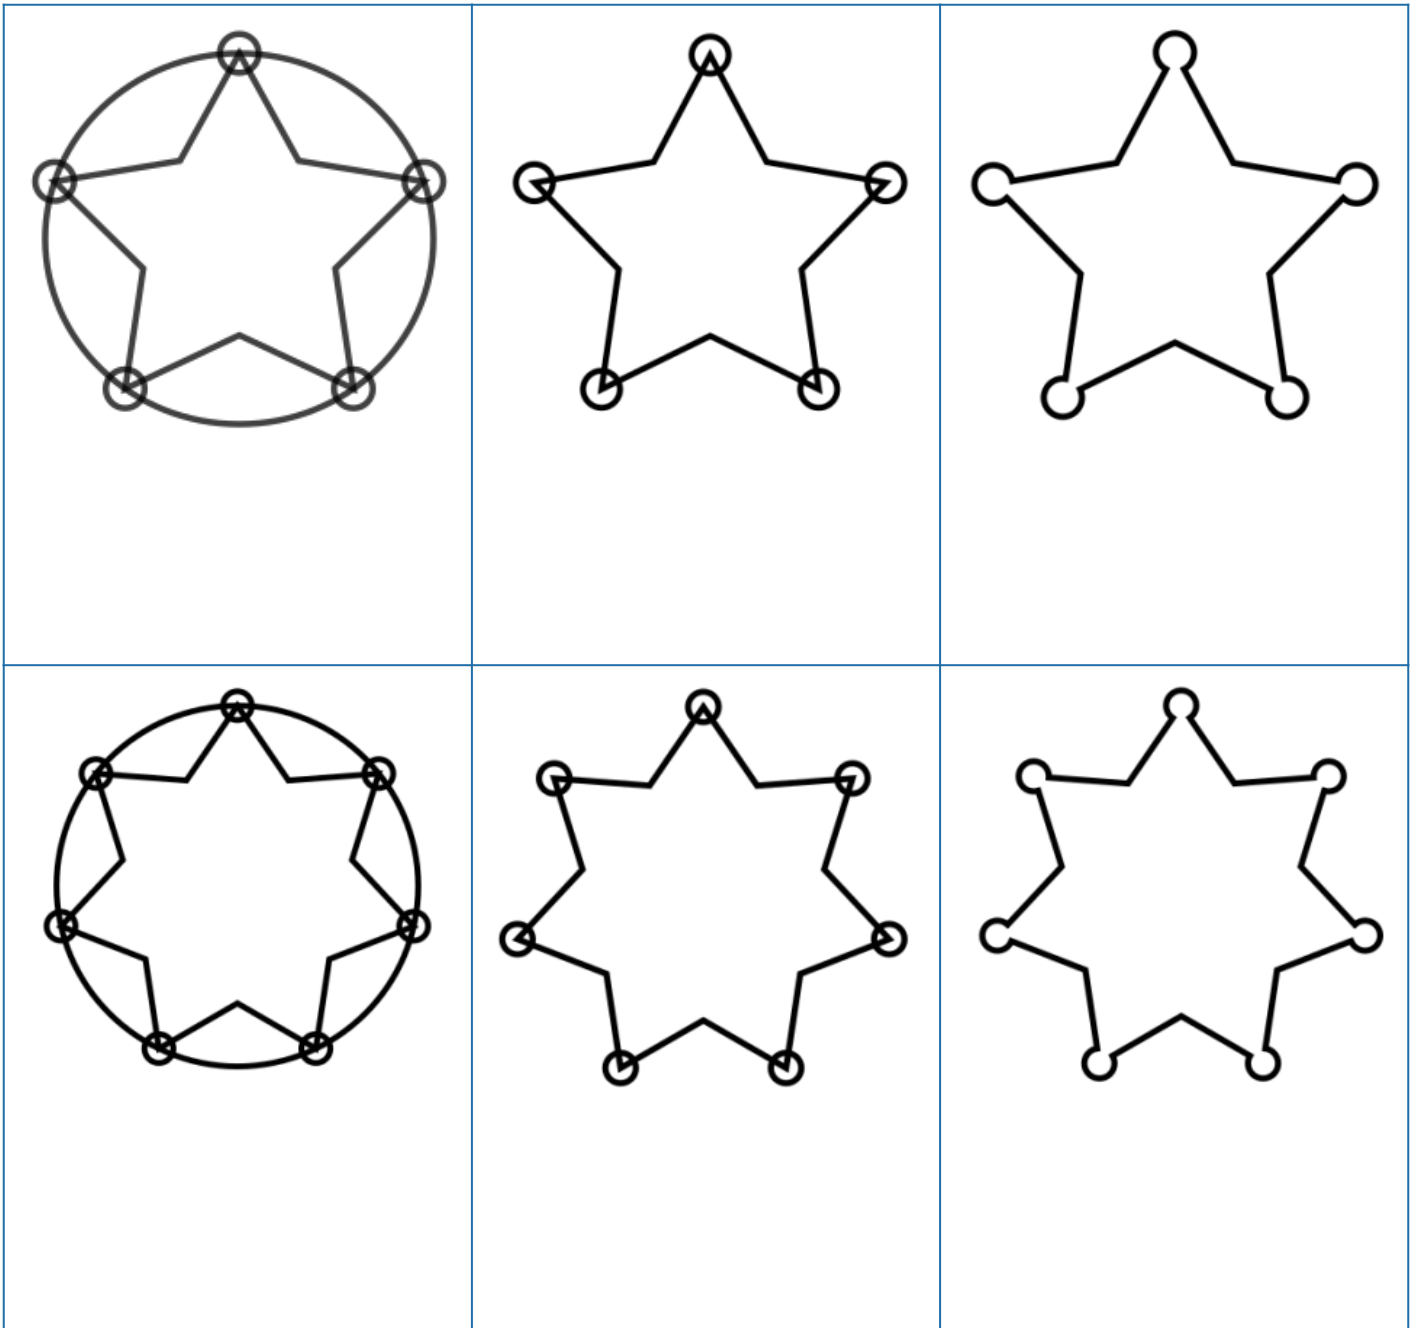

Sheriff stars typically have 5 or 6 points and also have a circle at the end of each point so that the badge can't accidentally stab the officer while they're wearing the badge.

6-pointed Sheriff Stars

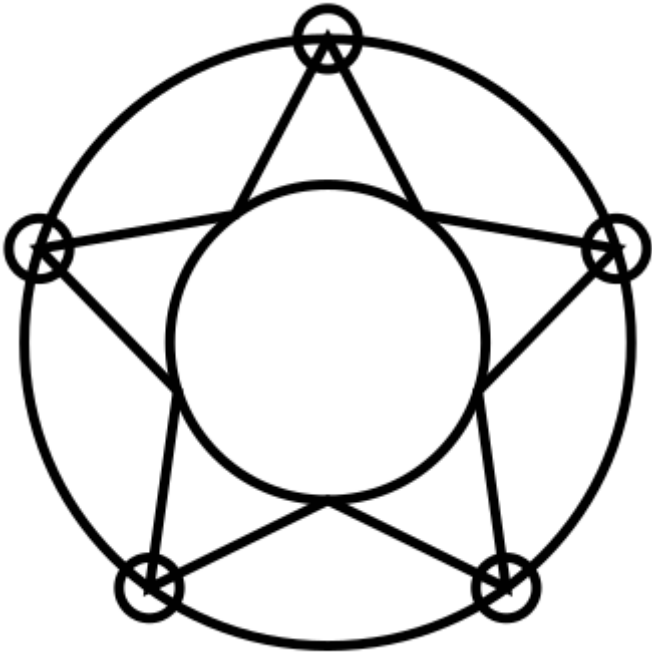

Shapes created by extension	Remove original circle	Union the shapes
		

The components (star, circles) are kept separate so that additional processing can be performed on each component if desired. To produce a sheriff star outline, just `union` the various shapes together.

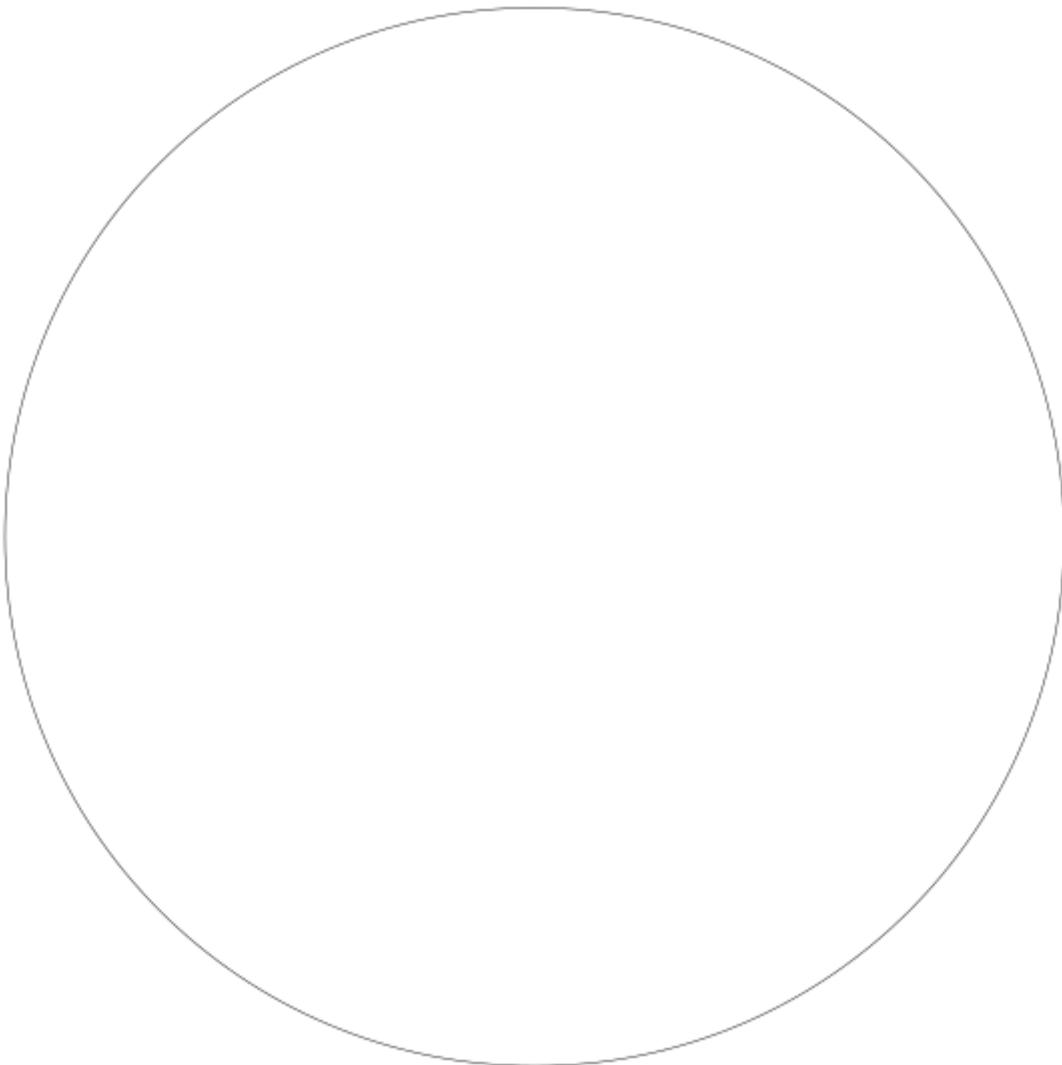

5- and 7-pointed Sheriff Stars

If the "Show inner circle" option is selected, then a circle touching the inner points of the star will be included in the output. Here is an example for a 5-pointed star:

This extension works with circles and ellipsis objects
