

Unwind Paths

An extension to wrap off paths to receive horizontal lines or extruded bands. Can be used for paper crafting, analysis and other works. You can also just use it to colorize path segments.

Tips:

- You can use [Move Path Node](#) to change the starting nodes of paths.
- You can use [Offset Paths](#) to offset the root paths
- You can use [Joinery - Laschen, Ösen, Nasen, Stege in 2D-Modelle einarbeiten](#) to add tabs, flaps or other connectors

Note: Unwind Paths is similar to <https://inkscape.org/~Shoshanaz/%E2%98%85horizontal-lines-effect-hlines>, but it is more advanced as it supports bezier curves and allows to create extruded bands, style config, etc.
