

Plotty (GCode Generator for Pen Plotter)

This is the ongoing replacement extension for the old [Plaster](#). We use this for our self-build pen plotter called [Plotty](#).

The image displays three screenshots of the 'Plotty (GCode Generator for Pen Plotter)' software interface, showing different configuration tabs.

Top Screenshot (Setup Tab):

- Pen Up Command: `M340 P0 S500`
- Pen Down Command: `M340 P0 S1700`
- Delay before pen-up command before movement in milliseconds: `100,0` (with minus and plus buttons)
- XY feedrate in mm/min: `4000,0` (with minus and plus buttons)
- Buttons: Abbrechen, OK

Middle Screenshot (Zero Point Tab):

- X: `0,0` (with minus and plus buttons)
- Y: `0,0` (with minus and plus buttons)
- Buttons: Abbrechen, OK

Bottom Screenshot (Pen Changes Tab):

- ☐ Pause on layer changes?
- Buttons: Abbrechen, OK

This tool can be used with different GCode flavours:

- Marlin: `M280 P0 0. .180` (float value)
- Smoothie: `M280 P0 5. .10` (float value; 0 turns off the servo)
- Repetier: `M340 P0 500. .2500` (int value)

Version #3
