

WebP Import

Import `*.webp` image files using ImageMagick conversion. Routine is webp → png → svg → write into Inkscape canvas.

You need to install ImageMagick. The command `magick` or `convert` needs to be in path variable, otherwise the extension will fail.

Fedora:

```
sudo dnf install ImageMagick
```

Ubuntu:

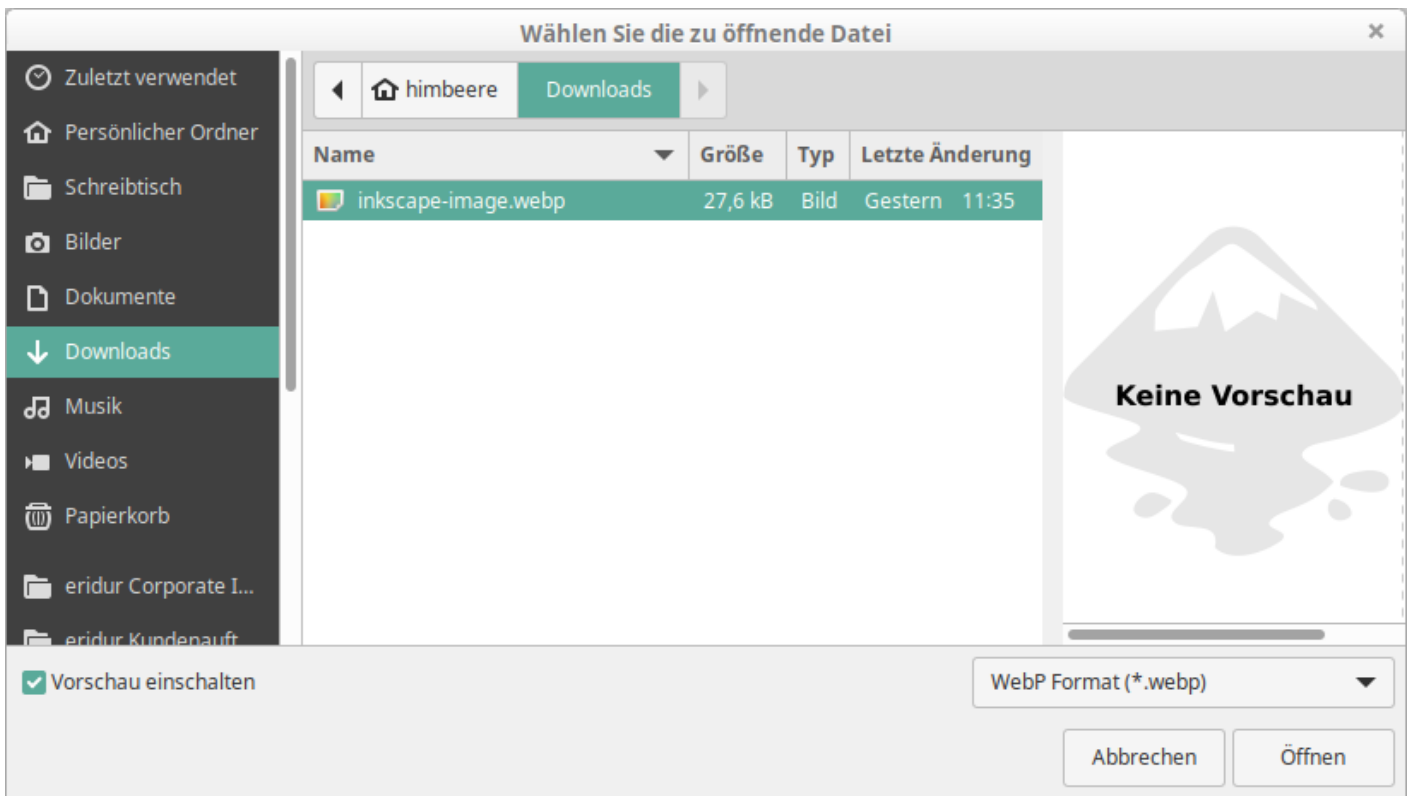

```
sudo dnf install imagemagick
```

Windows:

<https://imagemagick.org/script/download.php#windows>

Add the binary folder to `%PATH%`
