

Automatic Mail Importing (Inbox Scanning)

Inbox scanning **Enabled**

By enabling this feature, the system will scan the specified inbox every minute for **unread** emails and automatically import them. After importing an email, it will be marked as read.

Configuration settings for [Gmail](#), [Outlook.com](#), [Yahoo](#).

Last synchronization: Jan 9, 2020 10:29:08 PM, 0 message imported

Enable inbox scanning ☒

IMAP hostname

IMAP port (143 or 993)

IMAP username

IMAP password

Tag added to imported documents

 Save

 Test the parameters

This feature can be configured by environment variables! → [Environment Configuration](#)

Version #2
