

Ceiling Module | High Endurance Micro-SDHC card 32 GB 100 MB/s UHS Class 3 by SANDISK

This card is used for Raspberry Pi operating system. Because we collect a lot of data which we are going to store in InfluxDB we have a huge amount of writing cycles. In the past we tested out regular SD cards which were defect after approx. one year of life time. So instead we use a "high endurance" or "industrial grade" SD card. Please do NOT remove the sd card with tweezers. You should use a card reader. The following photo

How to create a system image dump?

```
sudo dd if=/dev/sda of=/home/tomate/Downloads/hangprinter-dump.img bs=1M status=progress
31914459136 Bytes (32 GB, 30 GiB) kopiert, 1016 s, 31,4 MB/s
30436+1 Datensätze ein
30436+1 Datensätze aus
```
