## Introduction

Hello! Thank you for buying Silent VR Cables by KIWI Design, the world's quietest consumer Head Mounted Display cable management system! Our system was designed and engineered by VR enthusiasts like you! Each components maximizes silence and minimize cable tug during use. Before mounting plan out your play area, mounting the last ceiling hook a little behind the center of your play area. This product comes with two types of screws depending on your ceiling surface. If you have a smooth or painted surface, the adhesive solution will work for you. After mounting all the pulleys, play around with the lengths of the pulley cables and the locations of the HMD cable holders on your HDM cable, possibly marking where you placed the straps on the HMD cable with pieces of tale to help with your adjustment. Ideally your cable will be loose enough not to constantly pull on your head, yet high enough for you not to bump into during your VR experience. This will depend on your ceiling height and your own player height. Walk around the play area holding the HMD on your head, or use a friend! Setting all the lengths just right will ensure the most pleasant and immersive experience!

## Product Diagram

## What's included

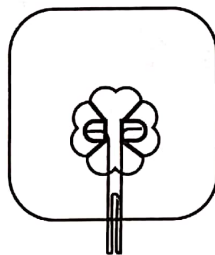

6x Silent VR cables

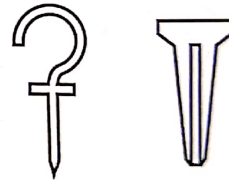

1x "L" wrench

1x Round  
Direction Connector

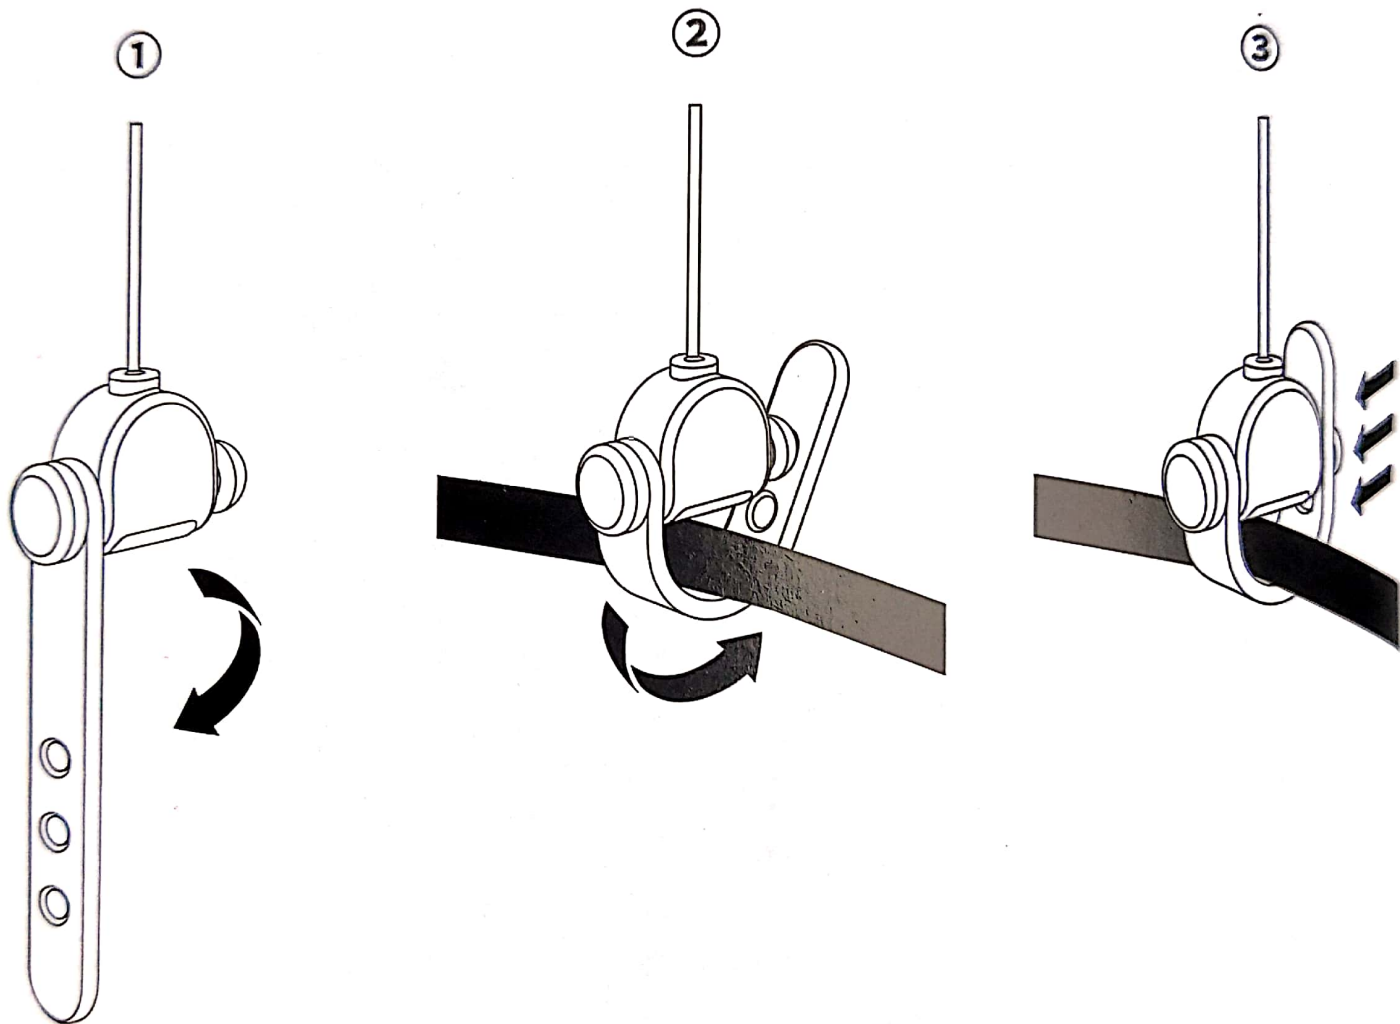

8x Adhesive Hooks

7x Screws with anchors

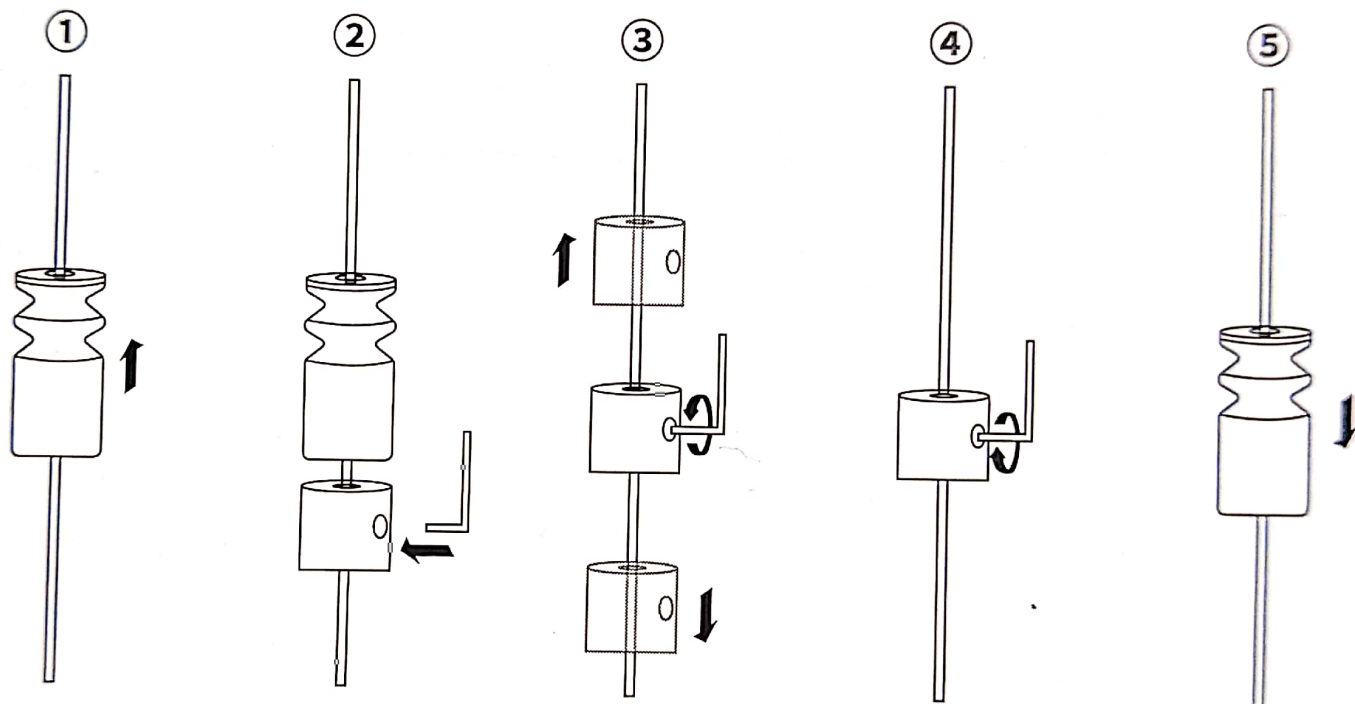

## Securing the HMD cable

1. Unstrap the HMD cable holder
2. Place the cable inside the loop
3. Secure it with the strap, try not to over-tighten

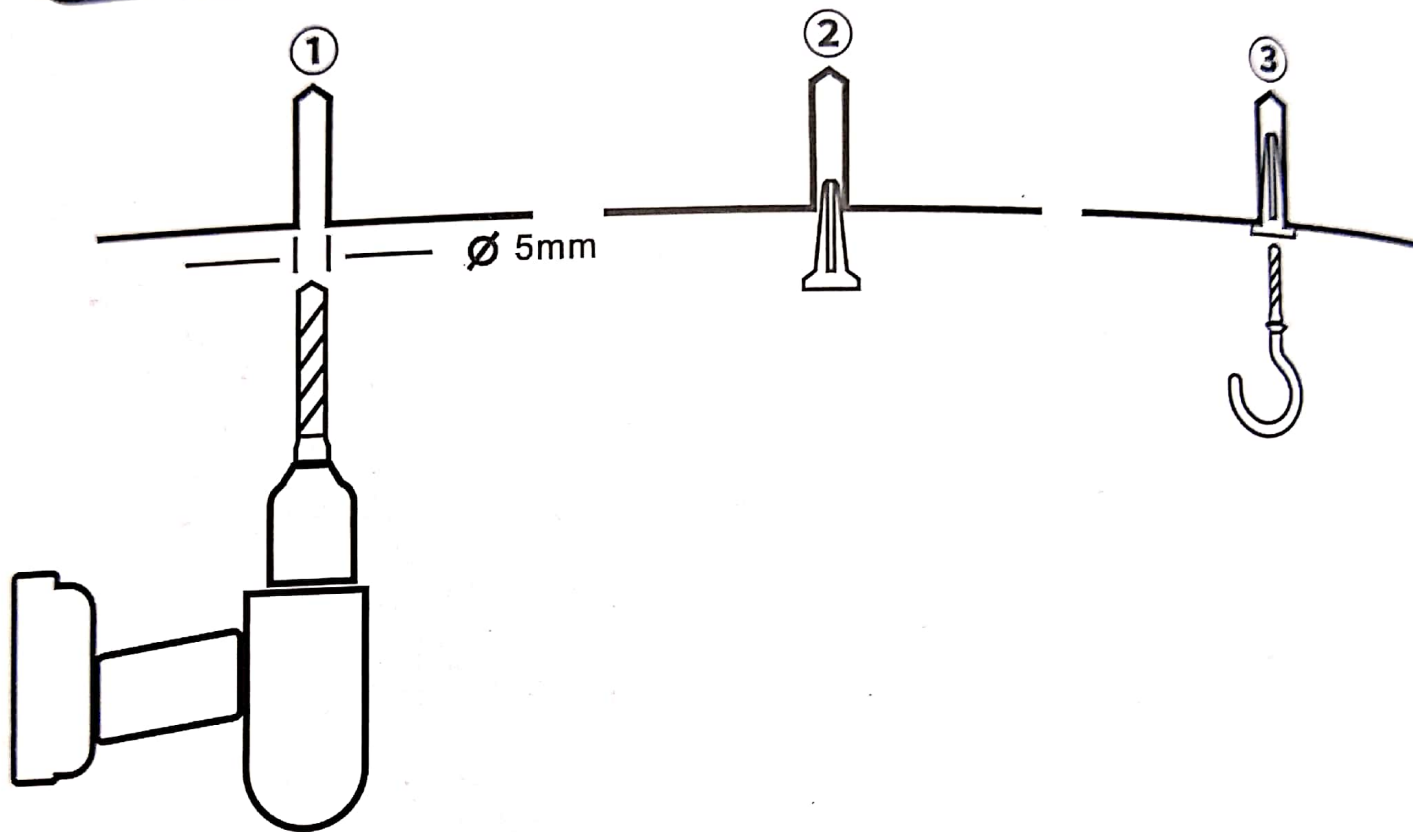

## Cable length adjuster

1. Pull up the noise dampener
2. Use the L wrench to Loose the bar
3. Adjust the bar place
4. Tight the bar
5. Recover the noise dampener

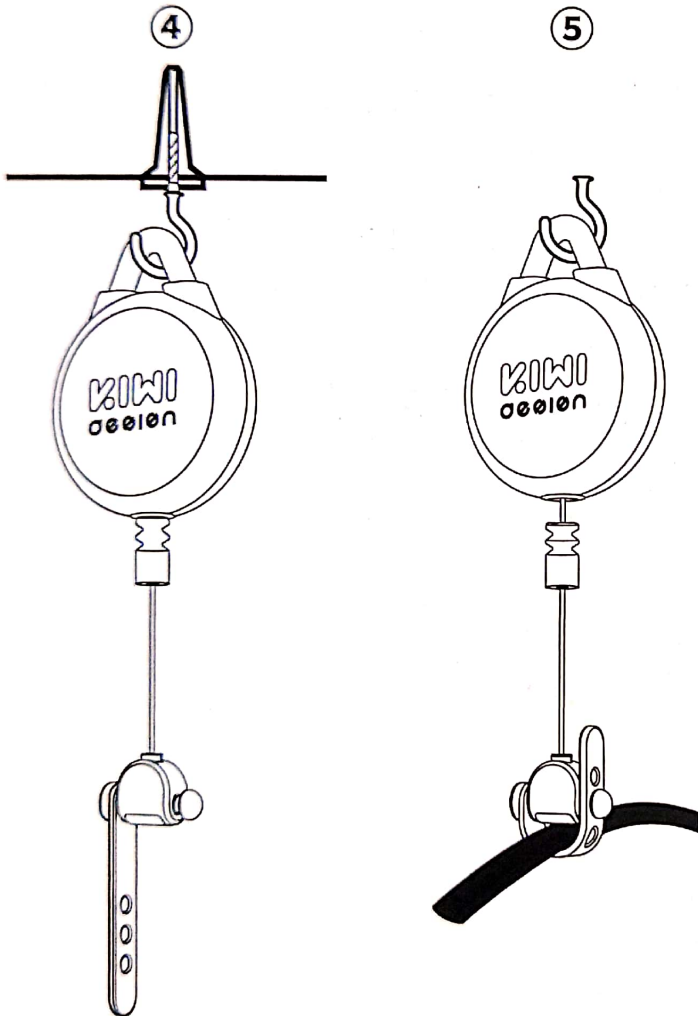

## Anchor screw hooks ceiling installation

1. Drill a hole about 5mm in diameter
2. Insert the anchors, lightly hammer if needed
3. Screw in the hooks by hand

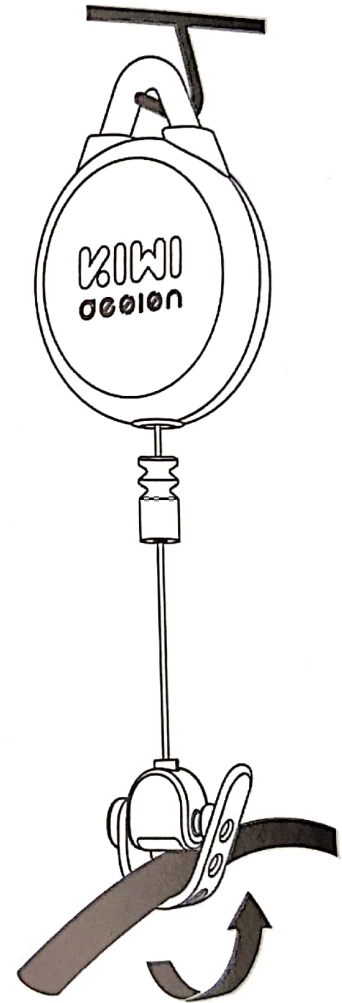

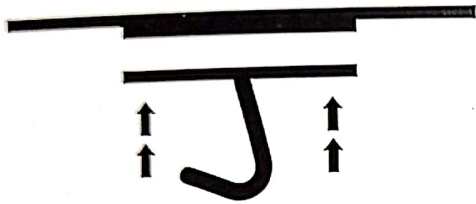

## Anchor screw hooks ceiling installation

4. Hang the pulleys

5. Securing the HMD cable

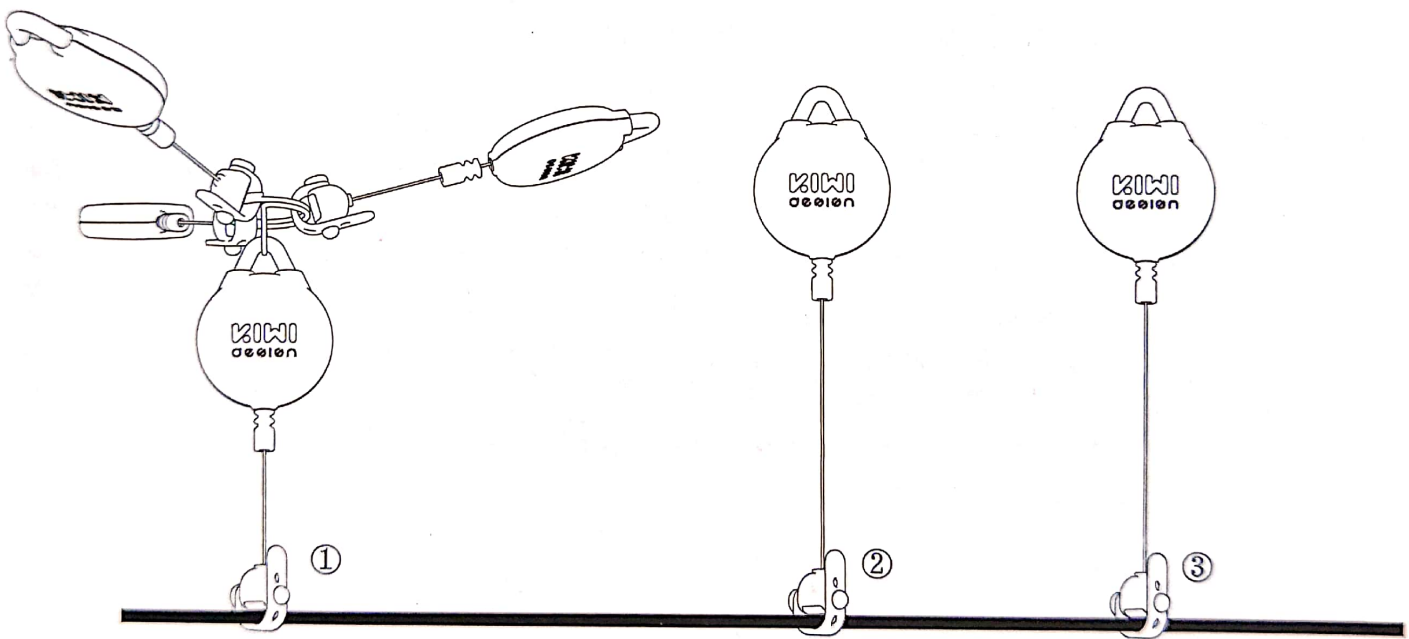

## Adhesive hooks ceiling installation

1. Make sure the attachment area is dry and clean,  
Peel to reveal the adhesive layer,  
Press firmly multiple times to squeeze out air bubbles
2. Hang the pulleys

## Ring Hook

It expands the movement play area. Decreases cable-tug, giving you better more immersive VR experience.

1. Hang the 3 pulleys on the ceiling equidistant from each other, like an equilateral triangle.  
Attach them all to the ring-hook in the middle.
2. Hang a 4th pulley in the middle at the bottom of the ring-hook.
3. Attach the HMD cable per regular instructions.
